🪪 Summary

Web Developer with a life-long dedication to learning and improving. Effective at combining creativity and problem solving to create modern applications that are both user-friendly and have a mobile-first design.

🗀 Projects

Game Secrets, *github.com/dylanjacob76/game-secrets* ⧉
- Developed the front-end user interface(UI)/styling of the project. This includes the login/signup page, the home page, the search page, the profile page, the posts themselves, and any other styling seen throughout the project.
- Created a feature that allows a user to delete a post they've created on their account.
- Thoroughly communicated with my team throughout the project. Assuring that any errors induced by miscommunication were kept to a minimum.
- Collaborated with my team to create the wireframe of our project.
- Technologies Used: *Cloudinary, React.js, Bootstrap, MongoDB, Fetch API, and Google Fonts*

PokeBaller, *github.com/dylanjacob76/PokeBaller* ⧉
- Made the application scalable to a mobile resolution through the use of media queries.
- Implemented transformable cards on hover through the use of CSS.
- Collaborated with my team to create the necessary controllers/routes for our project(peer programming).
- Technologies/Languages Used: *Express.js, Bootstrap, Handlebars, Sequelize, Express-Session, Lodash, pokemontcgsdk(npm package/API combo), Dotenv, Bcrypt, and Google Fonts*

Fresh Air Finder, *github.com/dylanjacob76/fresh-air-finder* ⧉
- Developed the front-end interface of the application.
- Collaborated with my team in implementing the National Park Services API, and the Open Weather Map API.
- Technologies Used: *Bulma, National Park Services API, Open Weather Map API, and Google Fonts*
